

A.P.G.A.I. (IRELAND)	Health and Safety Risk Assessment Form	
---------------------------------	---------------------------------------------------	--

Assessment Date:	Assessor: Lawrence Finney	RA-01
-------------------------	-------------------------------------	--------------

Area/Job to be assessed: Fishing Loughs/Lakes/Day Fisheries

Hazard No.	Hazards	Possible injury or harm	Risk Ranking without controls	Risk Ranking with controls	Risk Rating (HML)
1	Equipment failure rod breaks, oar breaks, faulty boat seat	Causing major injury or hospitalisation	3x2=6	2x2=4	L
2	Injury with dressed fly or by fixing bait to hook	Medium injury or hospitalization	3x2=6	2x2=4	L
3	Possible injury of being hit with fishing rod/fly or baited hook	Minor injury	1x1=1	1x1=1	L
4	Risk of drowning	Major injury or Death	3x2=6	3x1=3	L
5	Muscular skeletal injury	Injury	2x2=4	2x1=2	L
6	Slips/trips/falls	Injury	2x3=6	1x2=2	L
7	Protection of children and vulnerable adults	Injury and police involvement	3x4=12	2x2=4	L
8	Zoonoses	Major injury	3x4=12	3x2=6	M
9	Electrical Hazard	Death	3x4=12	3x2=6	M
10	Adverse weather	Death	3x4=12	3x2=6	M

Risk Scoring = multiply severity by probability		
Severity	Probability	Risk Category
4 - The risk could result in an accident or incident which could cause death.	4 - Very high probability of the risk having an effect	High = 8-16
3 - The risk could result in an accident or incident which could lead to a major injury	3 - High probability of the risk having an effect	Medium = 4-7
2 - The risk could result in an accident or incident which could lead to a minor injury	2 - Moderate probability of the risk having an effect	Low = 1-3
1 - The risk is unlikely to result in an injury or	1 - Unlikely that the risk will have an effect	

Who might be harmed? Identify who & the number of people that could be harmed.

Persons doing the job, co workers, visitors/public

Are there currently any control measures to reduce or eliminate hazards/risks?

Hazards Identified	Current control measures	Additional Control Measures – which could reduce risk
1	Equipment used is usually of good quality and brand. Equipment is serviced on a regular basis after use. Equipment is stored away safely away from sources causing obvious defects	A visual check of all equipment should be made to ensure no defects found
2	Safety glasses and cap are worn during fishing. In the case of using spinning rod, casting direction is to be where the cast is aimed at an angle away from boat partner	Before commencement of fishing always ask the customer if they have any special needs to cater for to identify any learning, physical or mental disability
3	Ensure the customer has a basic knowledge of casting and demonstrate the correct way of using a fly rod or spinning rod.	Ensure you are satisfied that the customer is proficient in casting and aware of the hazards associated with casting
4	Always ensure a life jacket or floatation aid is worn when in the boat	Ensure self-inflating aids have been tested and are safe to use. Make yourself aware if the customer can swim
5	Give short rest periods if required so as to reduce the risk of any muscular harm to client.	Ensure that the client does not unduly strain back or arm muscles during fishing rest periods to be considered during fishing
6	Ensure no trip hazards are present in the boat to ensure safe entry and exit of the boat can be carried out	Ensure rods and bags are placed to one side of the boat to prevent snags or possibility of anyone tripping and falling out of the boat
7	All A.P.G.A.I. Ireland Instructors are fully conversant with good practice guidance , and the precautions required during tuition	Instructors to be aware of the guidelines for good practice and guidance on Child Protection and vulnerable adults before commencing a service of fishing
8	To prevent the possible exposure to Zoonoses all instructors are given instruction and training on the risks	In the event of any pregnant female attending the event ensure that they are closely supervised and not exposed to areas

associated with working around and near water.

Diseases such as from animals are a high priority in controlling

Farm animal including cows, sheep, pigs, and goats, can pass diseases to people. As you know, farm animals are not like house pets and do not have places to rest or eat that are away from where they pass manure. Therefore, you should thoroughly wash your hands with running water and soap after contact with them or after touching things such as fences, buckets, and straw bedding that have been in contact with farm animals, adults should carefully watch children who are visiting farms and help them wash their hands well.

Different types of farm animals can carry different diseases. For example, cows and calves can carry the bacterium *Escherichia coli* O157:H7, often called *E. coli* (ee COH-lie). This germ can cause bloody diarrhea in people. In addition children can develop kidney failure due to *E. coli* O157:H7 infection. Pigs can carry the bacterium *Yersinia enterocolitica* (yer-SIN-ee-ah en-TER-o-koh-LIH-tee-kuh), which causes the disease yersiniosis (yer-SIN-ee-OH-sis). Many of these germs are in farm animal manure.

Some people are more likely than others to get diseases from farm animals. A person's age and health status may affect his or her immune system, increasing the chances of getting sick. People who are more likely to get diseases from farm animals include infants, children younger than 5 years old, organ transplant patients, people with HIV/AIDS, and people who are being treated for cancer. Special advice is available for people who are at greater risk than others of getting diseases from animals.

Leptospirosis

The bacteria are spread through the urine of infected animals, which can get into water or soil and can survive there for weeks to months. Humans and animals can become infected through contact with this contaminated urine (or other body fluids,

where possible risk of infections may be evident.

Young persons are to be given a brief induction to exposure to animal diseases. A wash station is to be provided to enable anyone who comes into contact with any animal faeces has the opportunity to thoroughly wash their hands or any other expose part of the skin that may have become in contact with such material.

Never let anyone wander along banks or in enclosures where wild animals may have been.

At the end of the event all equipment is to be thoroughly washed and if necessary disinfected to remove any excess dirt.

Ensure all young persons have thoroughly washed and dried their hands before leaving the event.

	<p>except saliva), water, or soil. The bacteria can enter the body through skin or mucous membranes (eyes, nose, or mouth), especially if the skin is broken from a cut or scratch. Drinking contaminated water can also cause infection. Infected wild and domestic animals may continue to excrete the bacteria into the environment continuously or every once in a while for a few months up to several years</p> <p><u>Diseases from Fish and Amphibians</u></p> <p>Fish, frogs, toads, and the water they live in can carry bacteria that may cause illness in people. Some people are more likely than others to get diseases from fish and amphibians.</p> <p>A person's age and health status may affect his or her immune system, increasing the chances of getting sick. People who are more likely to get diseases from fish and amphibians include infants, children younger than 5 years old, organ transplant patients, people with HIV/AIDS, and people getting treatment for cancer.</p> <p>Special advice is available for people who are at greater risk of getting diseases from animals.</p>	
9	Area is checked to identify any overhead power lines	Boatman ensures no casting is carried out on the boat within 20 meters of an overhead power line to ensure arcing from the power lines to the rod does not occur
10	Before fishing on open waters boat and equipment is checked and prior information on weather conditions to be obtained	Boatman to check weather forecast to ensure it is safe to venture on lake or lough

Relevant Legislation

The Health and Safety at Work Order
The Management of Health and Safety at Work Regulations
The Provision and Use of Work Equipment Regulations
The Workplace Health and Safety and Welfare Regulations
The Manual Handling Operations Regulations

Safe System of Work – this must be followed in all circumstances

- Ensure all Equipment is checked for any defects, regularly.
- Store all unused Equipment safely and correctly in the proper storage.
- Always ensure hooks are handled correctly when baiting and supervise casting of spinners
- Ensure Safety glasses and hat are worn during casting
- Check that the customer has no special requirements or needs.
- Ensure a First Aid box is at hand in the event of it being required.
- Make yourself aware of the nearest emergency facility if required
- Always ensure all parties wear a buoyancy aid, and a throw rope is at hand.
- Always ensure that fishing rods are never left lying on the ground to prevent trips.
- Ensure hand wash is at hand to minimize infection especially before consuming food or drinks
- Check on weather conditions before venturing out on open waters
- Ensure known electrical hazards such as overhead power lines are avoided when boating
- Do not consume alcohol prior to or during fishing on open water
- Ensure you have a means of communication with emergency services when on open waters
- Ensure a change of dry clothing is available on the boat

PROTECTION OF CHILDREN AND VULNERABLE ADULTS GOOD PRACTICE AND GUIDELINES

Implementation of the following guidance can reduce likely situations for abuse of children and vulnerable adults and help protect you and the organization from false accusations.

- It is for your own safety and that of all young people and vulnerable adults that you are not in a situation where you are alone for excessive amounts of time with a young person or vulnerable adults.

If privacy is needed, the door of any room you are in should have the door left Open and other staff/exhibitors advised of the meeting...

- Never engage in unnecessary physical contact including horseplay with young people or vulnerable adults. However there are occasions when physical contact is unavoidable, such as providing comfort and reassurance for a distressed person, or physical support, for example in contact sports.
- At venues Instructors must only use the toilets located in designated staff areas.
- Never engage in sexually provocative games.
- Never allow or engage in inappropriate touching of any form.
- Never allow children to use inappropriate language unchallenged.
- Never make sexually suggestive comments about or to a child even in fun.
- Never let allegations a child or vulnerable adults makes go unchallenged or unrecorded.
- Never do things of a personal nature for children or vulnerable adults that they can do for themselves. However, sometimes it may be necessary for staff/exhibitors to do things of a personal nature for children or vulnerable adults particularly if they are very young or disabled. These tasks should only be carried out with the full understanding and consent of parents/guardians. In an emergency situation which requires this type of help, parents should be fully informed, as soon as reasonably possible. In such situations, it is important that you ensure that you are sensitive to the individual and undertake personal care tasks with the utmost discretion.

- Each staff member/exhibitor must be acquainted with APGAI Ireland's Child Protection Policy and Procedures and in particular the reporting/referral procedure. Copies of this are available from the Secretary.
- Every staff member /exhibitor should be acquainted with the location of the first-aid provision and St John's Ambulance if in attendance.
- Staff/exhibitors should be aware of the accident /emergency procedures.
- Children must be left unsupervised at all times whilst under the care of the Instructor during tuition.
- Children must not be left unsupervised at any venue whether it is indoors or out of doors.
- Any activity using potential dangerous equipment should have constant qualified adult supervision and parent/guardian consent.
- Dangerous behaviour by children is not allowed.
- Staff/exhibitors should recognize the requirements for the ratio of young people to staff/leaders. All staff/exhibitors are asked to abide by the supervision ratios. The standard recommended ratios are:
 - 0-2 years = 1 member of staff to 3 children
 - 2-3 years = 1 member of staff to 4 children
 - 3-7 years = 1 member of staff to 8 children
 - 7 years and over = 2 members of staff (preferably one of each gender) for up to 20 children and young people, there should be one additional staff member for every ten extra children and /or young people or part thereof. The ratio of staff and volunteers to disabled children is dependant on the needs of the individual child/children/
- There must be adequate supervision in indoor centres.
- In the case of photography or video being used for promotional purposes, nominated persons will be assigned and permission obtained before any photographs or video is taken at the event.
